

Moreno Rapillo

Sound Designer

My name is Moreno Rapillo, and I'm from Italy. I am an audio engineer and sound designer with more than ten years of experience in studio recording, mixing and producing. I have my own recording studio in Turin, Italy, where I have developed all my techniques and experience in mixing, mastering and music production.

I studied and learned "Audio/Video Production in A.P.M." in Saluzzo, Italy, in 2008. I also successfully completed and graduated my "Mastering Audio" degree in 2019.

My career as a sound engineer started in 2008, when I joined a small Broadcast Television company for two years after my studies. I worked mainly as a sound mixer for live streaming events and also in parallel as a freelance sound engineer for festival and events such as live concerts, conferences and theater performances. Then in 2010 I started working in a cinema, taking care of technical operations and projectors (and also customer service), working with Dolby Technologies and Christie projectors.

I am experienced and trained in working with all major digital audio workstations (Ableton Live & Logic Pro), analog outboards, samplers and synthesizers and used to working a lot with bands and artists, producing independently.

I always work in a well organized and reliable way and have experience with all kinds of recordings (field recordings, voice recording, music recording, instrument recording).

Five years ago I started an electronic music project called "Altriparty", with which we released various music tracks under different labels. In September 2021 I worked with musicians on a project in collaboration with HMT in Rostock.

Since April 2022 I have been working as an event technician in Berlin.

In the last 3 years I had the pleasure to work for the summer season of the Bayreuth Festival.
